

Foundations of Computing (CS917)

Coursework 1 - Programming

Feedback for 1703762

Adjusted mark: 94%

Adjusted grade: A+

Code Remark - An adjustment has been made to your final mark. The mark shown above will contribute to your final module mark.

Student brought to our attention their code worked. Turned out to be a small mistake in the code that they submitted - once this was fixed, it did work as intended. New mark = Old Mark + 25 (for Part D entirely working) - 1 (for submitting broken code) = 94%

Your marks before adjustment were:

Mark: 70%

There was no grade before adjustment.

Feedback on your submission

Part A: Great work // Part B: Incorrect data not found handling - what if the file isn't named correctly, or isn't in the same folder? Otherwise good. // Part C: Great work. // Part D: Functions returned None for all test values (during automated and manual testing). Constructor does not need default args.
