Dear Gregory,

Thank you for your email.

This is not an allowed transfer as you would not be qualified to start the second year maths modules. Please could you discuss this with your tutor.

With Regards,
Nick

Dear Nick,

I believe you are the person to speak to about this matter. I'm currently doing the first year physics course and was wondering whether it is possible to switch from Physics to Maths and Physics after the first year. I believe I would be competent at switching courses. I understand the difficulties in catching up with the maths content but I have a proposition for that aspect. I was wondering whether I could speak to you further in person about this matter. I understand that there may be complications in switching but I would still like to discuss the matter further before being told I cannot switch. Thank you for your time.

Gregory Wright
First year Physics Student.

Dear Nick,

I would like to sit the maths modules. I understand it will be a difficult task but I believe I would be able to do well enough. I would like to know, atleast approximately, the dates I would sit the papers so I know how long I would have to prepare. I'll email Michael Pounds now aswell. Thank you for this opportunity.

Gregory Wright.

Dear Gregory,

There is no formal way allowed by the University that you can do this.

We can only allow you to sit the maths examinations informally in the department. To consider you for transfer to Maths/Phys you would need to take

MA137 Mathematical Analysis

MA106 Linear Algebra

MA133 Differential Equations

However, these are a very tough ask and we would not advise this you to attempt this.

If you want to go ahead please email Michael Pounds and myself and we will arrange for you to take these tests in the Physics department. To allow you to transfer we would need to be convinced that it was a good idea, i.e. that the marks were resonable and not way below those on physics.

With Regards,
Nick

Hi Nick,

I am interested in trying to switch to maths-phys and would like to know if I could potentially sit the September maths papers.

Dear Gregory,

We have now marked your maths papers. A sterling performance:

	MA106	MA137	MA133
1703762/1 MA133, MA137 MA106	97	80	80

Congrats! I will initiate a transfer to FG31 second year very shortly.

Best, Michael
